SKILLS

Automation & Functional Testing

- Selenium (Java)
- Playwright
- TestNG / JUnit
- Page Object Model (POM)
- BDD (Cucumber)
- WebDriver, Locators, and Wait Strategies
- UI & Regression Testing

API Testing & Integration

- Postman / Newman
- REST Assured (Java)
- JSON / XML Validation
- API Automation Frameworks
- API Versioning & Schema Validation

Performance & Load Testing

- Apache JMeter
- Stress & Load Testing
- Test Data Seeding
- Performance Metrics Analysis

Cloud & DevOps Tools

- Google Cloud Platform (GCP)
- Compute Engine, Cloud Functions, Cloud Logging
- CI/CD (Jenkins, GitHub Actions, GitLab CI)
- Docker / Kubernetes (for containerized test execution)

Programming & Scripting

- Core Java
- JavaScript / TypeScript (for Playwright)
- SQL (Database Validation)

PROFILE

Detail-oriented Associate SDET with hands-on experience in Selenium (Java), Playwright, API testing, and performance testing using JMeter. Skilled in building automation frameworks, working with GCP for test environments and data seeding, and integrating automation into CI/CD pipelines to ensure fast, reliable releases.

WORK EXPERIENCE

Associate Software Development Engineer In Test (SDET)

Unify Technologies Private Limited, Hyderabad, India 09/2025 - PRESENT

- Utilized Google Cloud Platform (GCP) for deploying, monitoring, and scaling test environments.
- Performed data seeding and environment setup on GCP for end-to-end API validation and integration testing.
- Automated API restart and validation workflows to ensure high availability and reliability under heavy load.
- Integrated CI/CD pipelines with GCP services to enable continuous testing and deployment.
- Analyzed performance metrics from GCP logs and dashboards to identify and resolve bottlenecks.
- Designed and executed automated stress testing and load testing scenarios using JMeter and Postman.
- Designed and implemented automation frameworks using Selenium (Java) and Playwright for web application testing.
- Created and maintained automated regression, smoke, and functional test suites to ensure software quality across multiple releases.

Software Consultant Internship

03/2025 - 09/2025

Unify Technologies Private Limited, Hyderabad, India

- Practiced Selenium WebDriver with Java for automating web applications.
- Created and executed automated test scripts using Maven and TestNG frameworks.
- Participated in writing and maintaining test cases, and performing functional and regression testing.
- Collaborated with development and QA teams to ensure quality deliverables.
- Completed a Selenium with Gen AI certification course, applying AI-based automation insights into test scenarios.
- Worked closely with cross-functional teams, including developers, QA, and project managers.

LANGUAGES

- English (Fluent)
- Hindi
- Telugu

CERTIFICATIONS

- SDET (Selenium Java with Gen AI)– Advanced Level

Magnitia Academy,Hyderabad,India
Duration: November 2024 – May 2025

HOBBIES&INTRESTS

- Exploring new automation tools and frameworks
- Solving coding challenges on HackerRank
- Reading about emerging technologies (AI, Cloud, DevOps)
- Contributing to open-source or GitHub projects
- Participating in tech meetups and hackathons
- Watching tech podcasts and webinars
- Fitness and outdoor activities for work-life balance

Customer Service Representative 04/2023 - 07/2024
QVC UK, Liverpool, United kingdom

- Assisted customers via phone, email, and live chat with product inquiries, order placement, returns, and complaints.
- Maintained a high level of customer satisfaction through professional and empathetic communication.
- Resolved issues efficiently by coordinating with warehouse, billing, and support teams.
- Documented all customer interactions in the CRM system for reference and follow-up..

Education

11/2022
Edge Hill University | Ormskirk, United Kingdom
Master of Science: Computing

11/2022
Postgraduate Certificate: Advanced Computer Science
Northumbria University | Newcastle, United Kingdom

08/2019
Hyderabad Institute of Technology and Management | Hyd, India
Bachelor of Science: Computer Science and Engineering

Projects

1. Web Application Test Automation
Unify Technologies Private Limited – Internship Project (6 Months)

- Automated 80% of test cases using Selenium WebDriver with Java, improving test execution speed and consistency.
- Implemented testing framework with TestNG and Maven, enhancing test reusability and maintainability.
- Conducted manual functional testing for key modules, ensuring 95% defect identification before UAT.

Technologies Used : Selenium, Java, TestNG, Maven , API. TDD, JavaScript, Git.

2. Unify Care
Unify Technologies Private Limited **Fulltime(SDET)**
Client: Tandam Healthcare Solutions/Star Hospital

- Unify Care is a comprehensive healthcare management platform that streamlines hospital operations by integrating modules like Patient Management, Practitioner Management, Billing, Packages, Appointments, Pharmacy, and Laboratory. The system supports multi-tenant architecture, automated workflows, and digital payment integrations for hospitals, clinics, and practitioners.
- Validated API responses and data seeding using Postman and MongoDB Compass.
- Verified JSON workflow configurations and tenant-based data seeding in Central Admin.
- Supported load and stress testing activities using JMeter for staging and UAT environments.
- Prepared detailed bug reports, Excel trackers, and daily status updates for QA performance tracking.

Technologies Used : Selenium, Java, Maven , API, JIRA, Git, GCP, Playwright, BotGauge, JMeter, Postman.
